Mon- Sat 9am - 8pm

Cash, all cc

Why is it important to clean Chimney & Fireplace ? Chimney cleaning is needed to remove creosote deposits and other debris from chimneys and vents. Creosote buildup in chimneys can lead to chimney fires and flue blockages, both of which can seriously threaten the safety of you and your family.

Having a chimney and fireplace in your home can be a real blessing and enjoyment. But like anything, Chimney boiler's pipe and Fireplaces require regular maintenance if they're to continue to serve you and operate the way they were designed to. And part of that maintenance involves regular cleaning services.

Although you may not see the damage taking place, an uncapped chimney will inevitably need extensive repair work. Caps help to block off the flue, preventing animal intrusion and moisture damage. Having a quality chimney cap installed is one of the best investments you can make towards protecting your chimney system from rust, corrosion. You can count on us!
